

My Trip to the Marlboro Free Library

This story will help me remember all of the things I need to know to have a safe and fun day at the library!

When we get to the library we can go in the front entrance

Or the side entrance by the parking lot

If I come in the side entrance I will see the children's library right in front of me.

3

If I want to go to a program, I would go to the community room located in between the children's section and front door.

4

If we come in the front entrance, I will see the circulation desk right in front of me. This is where I can check out items, ask for help, or take a key for the bathroom.

5

The bathrooms are located through the front sliding doors in the lobby.

6

**Now it is time to have some
Fun!**

I can find books and DVDs that I like and borrow them from the library. I can keep them for a few days and then bring them back for someone else to borrow.

In the children's area I can also use computers and play with toys or puzzles.

If I need help finding things in the children's area I can ask the librarian.

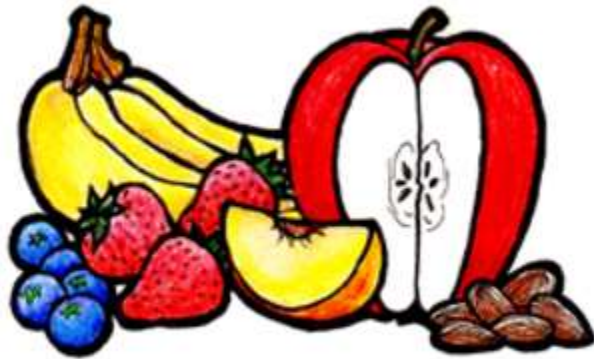

Sometimes at the library I will have the choice to do a special activity.

I may be able to do an arts and crafts project or work as a group to make something that will be displayed at the library. If I don't feel like doing a special activity I can just look for books like any other day.

I will remember that I cannot eat or drink in the library.

If I feel like I need a break, I can ask the librarians if I can use the community room.

This is a shared space with room to move around if I need it.
I can stay here until I am ready to go back into the library.
